Education

Faculty of Organizational Sciences

Information Systems and Technology

Extracurricular activities:

FONIS - Informatics Students Association

Projects

Portfolio Website

- Developed a personal portfolio website to showcase my skills, projects, resume, and contact information
- Implemented responsive design principles to ensure optimal viewing on various devices

Calculator App

- Implemented a fully functional calculator application using HTML, CSS, and JavaScript
- Put my JavaScript knowledge to test by implementing mathematical operations and user-friendly interface with three different theme options for users to choose from
- Practiced page layout by combining both Flexbox and Grid

Responsive Website

- Developed a responsive website from scratch to practice and showcase skills in media queries
- Implemented a fluid layout that seamlessly adapts to various screen sizes, providing an optimal user experience across devices

FAQ Accordion Card

- My first solo project where I applied fundamental HTML, CSS, and JavaScript concepts

Skills

HTML CSS JavaScript Git GitHub

Sass Bootstrap jQuery React Node.js

Teamwork Communication Adaptability

Problem-solving Self-Motivation Initiative
