Education

Faculty of Organizational Sciences

Information Systems and Technology

Extracurricular activities:

FONIS - Informatics Students Association

Projects

Portfolio Website

- Developed a personal portfolio website to showcase my skills, projects, resume, and contact information
- Implemented responsive design principles to ensure optimal viewing on various devices

Calculator App

- Implemented a fully functional calculator application using HTML, CSS, and JavaScript
- Put my JavaScript knowledge to test by implementing mathematical operations and user-friendly interface with three different theme options for users to choose from

Responsive Website

- Developed a responsive website from scratch to practice and showcase skills in media queries
- Implemented a fluid layout that seamlessly adapts to various screen sizes, providing an optimal user experience across devices

Form

- Created a form using the Bootstrap library; system form validation was turned off and custom field validation was written in JavaScript
- The form is submitted via the Ajax function; after sending the data, the form removes, and in its place prints a success message

Skills

HTML, CSS, JavaScript, Git, GitHub, Sass, Bootstrap, jQuery, React, Node.js

Teamwork, Communication, Adaptability, Problem-solving, Self-Motivation, Initiative
