LENA PULETIĆ

Frontend Engineer

github.com/lenapuletic linkedin.com/lena-puletic puleticlena@gmail.com +38165/205-3876

Angular-specialized Frontend Engineer with 2+ years of experience building clean, responsive, and maintainable web applications. Leveraging AI-first development approach to improve productivity and delivery speed. Committed to staying current with the broader frontend ecosystem and adaptable to working across different frameworks as project needs evolve.

Technical Skills

Frontend: Angular, React, TypeScript, JavaScript, HTML5, CSS3, SCSS, Tailwind CSS

State Management: NgRx, RxJS

Backend Interaction: RESTful APIs, Swagger

Testing: Vitest, Jest

Tools & Version Control: Git, GitHub, GitLab, TFS, Webpack, npm, Angular CLI, Vite

UI/UX Principles: Responsive Design, Cross-Browser Compatibility, Accessibility

Other Skills: Agile/Scrum, Figma, Node.js

Experience

Frontend Engineer | Grid Dynamics — *August 2025 - Now*

- Developing two applications within an enterprise FinTech platform serving financial advisors, built with Angular 19 and TypeScript in an Agile Scrum environment.
- Implemented a micro-frontend architecture, enabling independent module deployment, improving scalability, and accelerating feature release cycles
- Implemented frontend design patterns including smart/dumb component separation, Facade pattern for state interaction, and centralized state management
- Migrated state management from the traditional NgRx Store to NgRx SignalStore, simplifying the codebase and significantly reducing boilerplate code
- Ensuring high code quality standards by applying clean code principles and Angular best practices

Junior Frontend Engineer | Grid Dynamics — *December 2023 - August 2025*

- Developed reusable UI components and resolved bugs with a focus on performance and maintainability
- Integrated RESTful APIs to enable core application features including dynamic data loading, CRUD operations, and user entitlements handling
- Used NgRx for state management and RxJS Observables for handling asynchronous data streams and HTTP requests
- Maintained >90% test coverage using Jest, ensuring high code reliability

Personal Projects

Portfolio Website

- Built a personal portfolio website showcasing projects developed with Angular, React, TypeScript, SCSS, and Tailwind CSS, along with skills, resume, and contact information

Certifications

Google Cloud Associate Engineer

Google Cloud Digital Leader
